

LOOK: FOURTH-YEAR BSCS STUDENTS PRESENT THEIR RESEARCH OUTPUTS TO CAMPUS HEAD ATTY. JAMALODEN A. BASAR

The fourth-year Bachelor of Science in Computer Science (BSCS) students presented the completed systems they developed for the campus as part of their CSC 199- Research Study with System Engineering course to the visionary and supportive Campus Head, ATTY. JAMALODEN A. BASAR, at the Campus Head Conference Room of the Administration Building on June 15, 2023.

The main goal was to convince the administration that the completed systems they had developed, which were the outputs of their research studies, were user-friendly, dependable, efficient, and effective and that it was necessary and high time for the campus to implement and digitize the processes of the intended users. Thus, the following systems were introduced and presented:

- Upgraded Website for MSU-MSAT
- Dr. Magadapa Ali Ringia Hotel Web-Based Property Management System
- Registrar's Online Appointment System for MSU-MSAT
- High School Grade Reporting and Recording System of the MSU-MSAT
- Student Online Health Information Management System of MSU-MSAT
- Faculty Union Cooperative Management System of MSU-MSAT

After the presentation, the Campus Head, who places a high value on research and innovation, stated that he would support the efforts wholeheartedly because they would undoubtedly aid in the campus' continued growth.
